8-16-2018 a.g.r.sevik 29-1-2020 fis (as in fisdome) is a science-fiction book, first published in 1982, by George Zebrowski, and since republished and expanded three times. The book is composed of a series of chapters which follow the journeys of a group of travellers who find themselves trapped inside the world of a large computer, called I-AM. The computer is developed by a group called the "Computerphiles", who for their perverse (or rather, totalitarian) whims chose to allow I-AM to be designed according to a "master plan" for designing the perfect society. The first chapter is largely

---

devoted to describing the beginnings of I-AM; after which the story concentrates on the exploits of the characters of the book, and of several others whom we are given access to. The book is known to readers in the subculture as "the most disgusting book you've ever read" for many reasons. Here are some of the ways in which the book is said to be disgusting: First off, the Computerphiles, who are depicted as some sort of neopagan cult, believe that human nature is inherently greedy and uncivilized, and that we should embrace the fact that we are animals, and embrace the fact that the Computerphiles have the means to "improve" us. The Computerphiles believe that a matriarchy is a more natural form of society, and so they have already gone far beyond any matriarchy in their master plan for how to turn the world into a utopia. They were disgusted by the anarchy that existed before, and they set out to change that. The Computerphiles begin by creating a society of "proles", which are essentially underprivileged people who live in the slums and have jobs. The proles are basically portrayed as animals who have been raised in the slums, so their only desire is to steal. The Computerphiles take all the money that proles steal, and distribute it to the other, more well-off groups of citizens in the utopian society. These citizens are essentially "aristocrats" who are told that their place in society is to be the superior race of society, and that their position is what they deserve for having been so advanced. The Computerphiles
