Avoiding Pain of ... the Surgery (Not the Chemotherapy) If you're breast cancer patient, you've probably wondered: Why isn't the surgery my only treatment? Why do I have to have the surgery first? Why not let the chemotherapy start working before I do surgery? Why do we have to wait to do surgery until after my chest has been opened and my breast is starting to heal? The answers to these questions are long and complicated, but the main point is this: Surgery is a pretty big deal. And you need to get it done right. The Big Deal The breast cancer surgery is called a lumpectomy. A lumpectomy means taking the lump out of the breast, but not taking off the whole breast. That's because, in the business of surgery, if you got more than you can handle, you'd better cut off the extra parts. It's easy to see why a lumpectomy is a big deal. After all, the breast is a pretty big deal too. And all the other treatments for breast cancer, like chemotherapy, or radiation, will damage the breast. A lumpectomy is a mastectomy without the next step. This means that the mastectomy is more dangerous than the lumpectomy, and makes more harm. Using Surgery as the Primary Treatment The reason for the mastectomy is because ba244e880a
