org ; Download now and enjoy! Description NOTE: This download is a.zip archive. You will need to extract the archive to your computer to use the program. Update: This download is a dummy "description" as at the moment of updating the program I don't have permission to upload the full program. The program you are downloading will work as the programs description stated but it will not have all the features of the full program When you use the program, you can select various options from the top menu bar. The default settings should work for most people. How to use the program There are several different windows on the main screen. The large window in the center is for displaying your currently selected sound. When you select a new sound, you can use the slider to select how loud you want the new sound to be. You can also use the Volume Slider on the left to adjust the volume of the new sound. The windows to the left and right of the large window display your currently selected sound along with the history of the last 25 sounds you have played. In the top left corner of the main screen there are a few options. These options may be used to move the volume slider, mute/unmute the sound, or show the program's preferences. The first option will let you change the default time the program is going to switch between the background and foreground sounds. The second option will let you change the default folder to use for storing the sound files. The third option lets you select between 4 different style sounds you can use to alert you when a new sound has been selected. Features of the program Add a new sound file by dragging and dropping it onto the program's main window You can change the sound's volume level You can mute/unmute the sound You can turn the sound on or off You can turn off the program's sound You can reset the program to default settings (i.e. use the settings of the program when you first start it) You can move the slider to the left to lower the volume of the new sound You can move the slider to the right to raise the volume of the new sound You can show/hide the history of all the
