... I can't find out which one it is on the computer, the website or the expo itself. When I open the file I can see it is actually stored as a graphics file as opposed to a text file. Anyone know what is going on and how to fix this? A: The problem was that a previous user had changed the file name to what I wanted. Human epidermal growth factor receptor-2 (HER-2/neu) has been implicated in the development and progression of many human solid tumors. We used microarray analysis to define the transcriptional profile of HER-2/neu-positive breast tumors. Compared to HER-2/neu-negative tumors, HER-2/neu-positive tumors have a distinct transcriptional profile and evidence of a molecular switch between pre- and post-receptor signal transduction. These findings have important therapeutic implications for future treatment of this disease.
