Matt Sottile/Globe Staff It wasn't supposed to be like this. The South Boston Transit Center has been the target of politicians and local residents, wanting to replace it with a larger, more modern hub. They were promised new buses and a network of in- and out-of-station connections. They were told this project would be the first new hub built in a decade. And it wasn't supposed to be a car park. And all of a sudden, the project has taken on a life of its own, with escalating costs and a big question about whether the western part of the transit center, where commuter rail lines merge and cross, will be open by the time the first buses are scheduled to leave in 2016. The \$1.3 billion project was to be completed by 2014. In June, Mayor Tom Menino said it was coming "even if it costs \$20 million a month." But by the end of last year, Mayor Thomas Menino, while making a tour of the project with reporters, said it could still be done in 2013, but that it would require additional funding. "In terms of the date, it looks like we're still moving forward with that. I think we'll be able to get this done in time. It's not in the budget, I would say, but it will be in time," he said. "But it is not going to be a done deal unless the money shows up," Menino said. "It's the biggest infrastructure project in this city, and I think we have to be cautious." The
