The best IDE for developing enterprise-grade Java applications.Q: Unable to install Oracle JDK 11 in Linux using Docker I've already installed a.deb file into the Linux container using: docker pull oracle/s2i and docker pull oracle/s2i-java11 I've followed the guide here. But when I run sudo yum install -y java-1.11.0-openjdk.x86_64 I got this error.

[sudo] password for dhware: Loaded plugins:
fastestmirror Loading mirror speeds from cached
hostfile * base: linux * epel: ftp.jp.debian.org *
extras: linux * updates: linux * webtatic: linux
Setting up Install Process No package
java-1.11.0-openjdk available. Error: Nothing to
do Is there anything I'm missing? A: You have to
make sure you have a mirror to download from.
At least as Oracle I and OVH, which uses Oracle
M but it looks like you're using a local mirror.
You can use the oracle/s2i-standard image to
download java 11.0 from the official Oracle
website. Q: Deserializing a JSON string from
XElement to object with
DataContractJsonSerializer I have some Json I am
pulling in from an api. the simple version looks
like this "InsertTestCase": { "ID": "1", "name":
"test d4474df7b8"
