Russian Search-Seeker Fleeing U.S. Charges for Submarine Anomaly A Russian man who defied a U.S. criminal complaint and fled to Belarus has been extradited and faces a new set of charges in U.S. District Court in New Jersey, according to court documents. The extradition was necessary because Leonid R. Chubais, 43, a resident of Moscow, had been accused of violating the Foreign Intelligence Surveillance Act (FISA) and of lying to federal law enforcement officials, according to court documents filed in Newark on Wednesday. FISA is the federal statute that governs the legal use of surveillance of Americans' communications and activities. Mr. Chubais was arrested and extradited from Belarus on Tuesday, two weeks after he first left the country. He had come to the attention of U.S. law enforcement in July 2005, when he allegedly violated FISA by communicating with employees of the Caspian Energy Corporation, a Russian energy company. According to an affidavit in the Newark court, a Caspian Energy employee reported his conversations to the FBI. In 1d6a3396d6

The program: 1) extracts the music track from the audio file 2) converts it into MIDI, that is, is converting the music file into a symbolic form 3) converts the converted MIDI into wav format 4) extracts the melody of the track (on pitch) and makes a score that represents the performance, as well as the position of the voices and the chords. 5) filters the score, changing its notes. 6) If the source track is sung into a microphone, the program can convert the voice into the score MIDI. 7) The program can recognize the notes sung in the source track, even if they are sung in an unusual way, and take the same score with the right notes, even if they are sung out of tune. 8) converts to wav and saves the song 9) Converting wav to MIDI is very fast (5 seconds) Additional information: Sloud UB Composer is a musical instrument containing a great selection of musical timbres. For instance, when singing a tune into a microphone you can simultaneously hear it blown by the trumpet or the sax, performed by the electric guitar or even beaten by drums! Sloud UB Composer "feels", recognizes and then plays back all the nuances of voice motion, all the mistakes and false notes. User can also edit notes of recognized MIDI melody. While the image is displayed, a audio file plays along with the image. The audio file will loop forever or until you close the program. Audio files and image files are sent to the appropriate application by using the Internet or USB. It's very useful for those who have a slow Internet connection or who don't have a computer. Additional information: - If you use the USB to send the image file to an external computer you will not be able to take a new picture. You will have to delete the current image first and then create a new one. - USB is the only way to send audio. - Image resolution is available in: - 640 x 480 - 1024 x 768 - 1280 x 1024 - 1600 x 1200 - 1920 x 1080 - 2160 x 1200 - 2160 x 1800 - 2560 x 2048 - 1280 x 720 1.
