Some of the most important features of Photoshop are described in Chapters 5, 8, and 16. When you're creating a website, using the Wordpress-oriented program, InDesign, or similar types of programs, you need to have access to a program that has the ability to open and edit images. Most of these programs have a similar interface to Photoshop; some are free or low-cost options that offer a similar depth of features. PhotoShop Elements is an easy-to-use, low-cost but capable image editor. Adobe Photoshop Express is a mobile app that also has a limited image-editing ability. ## Coauthoring Photoshop As you begin to edit images, you'll notice that you can quickly see the layers of your images. You know that you can change the alpha channel (the transparent channels on a normal image) by changing the layer's blend mode, applying layer effects, and so on. However, you can also use Adobe Photoshop to control your image editing program's features. Photoshop has special layer-based tools — or commands — that enable you to control what happens with your image. You can use these commands to apply special effects to all of your images and even to different areas of your images. See the sections in this chapter to find out which controls are available on each layer of an image. The following list summarizes the most important layers and features and what you can do with them: * **Layer:** This is an editable layer. When you change the blend mode or opacity, for example, it affects all of the other layers in the file. * **Content:** The Content layer holds the image's pixels, and you can also edit these pixels (unless you have a content-aware fill feature). * **Hair:** This is the _transparent_ layer. In a red-green-blue (RGB) file, the layer corresponds to the _color model_. In a CMYK file, the layer is a black layer. * **Background:** This is the Background layer. (Technically, this layer is the Layer 0 layer, as it's usually the first layer you create.) This layer is visible on all images but is not editable and is used only for drawing guidelines. * **G1:** This is the Layer 1 layer for a CMYK image. * **Background 1:** This is the Layer 0 or Layer 1

Vegan Peanut Butter Chocolate Ice Cream Vegan Peanut Butter Chocolate Ice Cream Happy Earth Day! We have been enjoying the first of the three 4th of July weekend days of our trip to the North Coast with burgers, barbecue, and lawn games. We're not big grillers but despite being away we've managed to have plenty of burgers! The first batch was on the grill. We made a juicy, smoky burger of seasoned seitan with a soy ketchup and Bar-B-Que Sauce. We chose to have it with french fries. For dessert we needed something a little more "vanilla ice cream" than what we're used to getting here. I found the perfect "non dairy" dessert with the Olegnika Chocolate Ice Creams. Their Italian-style puddings are coated in chocolate and sorbet. We enjoyed a few spoonfuls of this vegan chocolate ice cream and decided to feature it on our blog today. I was excited to have this tasty frozen treat on the menu since vegan (and gluten free) ice cream is an ingredient that can be tricky to work with. Unfortunately, my experience has been that all frozen dessert shops here in the U.S. do not sell suitable goods. The ice cream is often iced and not actually frozen. It can be very expensive, too. Honestly, I'd rather buy a single 20 oz container of soymilk than try to find a vegan dessert at a regular store. Our famous homemade corn tortillas and the classic black beans from Southwest Missouri are served up in the tortilla bowls which are about the size of a small plate. They serve four guests easily and only come with the necessary ingredients to make your own tortillas. We're headed to the North Coast of Missouri for one more weekend for the second annual Vegan MoFo and a food festival. If you're in the area and feel like joining us on Facebook for a little taste of the coast, our trip, and the vegan food community, check us out:Q: React - Get specific component's prop from event handler In React I have a component to handle the click of an image. I'd like to get the src of the clicked image as part of the event handler. How do I do that? class ImageClickHandle extends Component { constructor(props) {

Double Walled Roller Bearings Put to the Test Double Walled Roller Bearings Are Also Known As Double R's Double Walled Roller Bearings Are Also Known As Double R's Double Walled Roller Bearings Are Also Known As Double R's A double-walled roller bearing is a bearing that has an inner and an outer bearing shell. It is normally manufactured from a set of inner and outer bearing races and rollers, all held together by a wedge inserted between the shells. Double Walled Roller Bearings Are Also Known As Double R's A Double Walled Roller Bearing is also referred to as a Double Walled R bearing. A Double Walled Bearing is a slightly larger version of the single Walled bearing. A Double Walled R bearing can easily be mistaken for a Single Walled R bearing, but will always have a thicker construction. Double Walled bearings are designed to provide higher load carrying capacity with less maintenance and lubrication. Double Walled Roller Bearings are one of the most popular bearings in the World, and are used on heavy equipment, such as Fork lifts, for the inner race with thinner material. Double Walled roller bearings are manufactured with an array of different materials including ceramic, steel and plastic. Many of these bearings are available with a ceramic inner race to reduce friction and a sealed housing to avoid corrosion. Double Walled Roller Bearings are manufactured from different materials. Some are made with ceramic materials whereas others are made with metal. Ceramic bearings are more expensive than metal bearings, but will offer higher levels of reliability and life expectancy. On our website you will find a wide range of Double Walled Roller Bearings for many different applications. These bearings are extremely popular and cost effective, plus they are easy to install. Our bearings are guaranteed to meet all the toughest industry standards. If you cannot find what you are looking for, please contact us, we can make your project.
