### What's New In EasyLock?

<h1>EasyLock v1.1</h1> <p>Encrypts your content by generating a 256 bit AES key. Two encryption keys are generated, one for the vault and one for the vault only. You can add password to vault. When the password is entered the vault will be unlocked. To re-lock your vault, a new password is needed. No file will be visible, when the vault is unlocked. Even if the password is not set the file will be invisible.</p> <p>Once the vault has been unlocked with the password it can be added to your pen drive. In the folder options, you have the option to check whether or not to add the vault to the pen drive when adding folders. If checked it will add all the subfolders of the vault to the pen drive when added a folder. Also if checked, when adding a folder to the pen drive it will add the vault folder to the pen drive. If not checked, the folders will only be added to the pen drive if they are not present in the pen drive already.</p> <p>An option in the menu is to show hidden files and folders in the current folder.</p> <h1>EasyLock v1.0</h1> <p>Encrypts your content by generating a 256 bit AES key.
