method. Invest in a quad. There are a wide range of sea life toys that you can get for kids who have an interest in this. The simplest and least expensive are those made by small local companies. You can also get them made by companies in the UK and USA. Before you buy: Research quads for your children and ensure that you get one that has all kinds of features. Watch how children use it. You don't want a toy that is falling to pieces after a few weeks. Second method. Collect plastic waste. In order to collect the plastic, you will need a garbage bag, plastic bags, and a bottle openers. As long as you have these, you will be able to get many quads.

It is recommended that you use plastic bags because they will absorb most of the oil and tend to last longer than the normal trash can ones. Getting the plastic: After getting the plastic, you can make all kinds of things out of it. Try this one for example: Take your BB quads that you have collected so far.
