In popular culture The film The Graduate was based on the novel by writer/director Richard Schickel. In the novel, the main character at first thinks he is going to attend law school. It is only later he realizes that he is actually going to be in the aerospace program at the Stanford University. In the film Blade Runner, the main character is trying to help an artificial humanoid (nicknamed Replicant) with its aging process. The Replicant keeps changing his appearance from his original, plastic-bodied form into a more human-like, cloth-bodied form. This is done by taking off or repairing his original body with a portable workbench. Bibliography 5b5f913d15
