

---

of work, but are extremely complicated. Here's what I have: sed -i "s/blahblah/blahblahblah/g" \$FILE  
However, it only finds the first occurrence. I'd like to find the second last occurrence and then replace it  
with "blahblahblahblah" Thanks! A: You can use sed's /P modifier to repeat a pattern just as many  
times as possible. sed -n '/blahblah/P s/blah/blahblah/g' file -n suppresses processing of the standard input  
'/blahblah/P' the 'P' allows the search pattern to repeat the last time it was executed, in this case the '/' is  
escaped with a \ since / is an escape character. /\* \* Copyright (c) 1997, 2018 Oracle and/or its affiliates.
