The origin of Asians can be traced back to a part of Africa as they have strong roots in the continent. In addition, Asians have their own language and physical features. In simple terms, Asians are a subcategory of the human population and a diverse ethnic group with their own identity and origin. In this article, we will be discussing about the people who can be classified as Asians but, at the same time, it will also highlight the difference between Asian Indians and Asians. This will be one of the most in-depth articles on this topic. Who Are Asians? A representative of Asian ethnicity is of Asian-Pacific Islander origin. However, the term Asian is more commonly used to refer to the people from the continent of Asia. Generally speaking, Asian consists of the people whose family origin is located in the continent of Asia. When it comes to a definition of who can be regarded as an Asian, first and foremost, there are three main components that are considered in this case. These components are Living in the Asian continent Having an Asian descent and Having the physical features of an Asian. For most Asians, their physical features are what set them apart. It is mostly the facial features of Asians

## What's New In BlockTube?

YouTube is the largest video sharing platform and most of its users are children under 18. Children are often using YouTube without parents' knowledge and often watch inappropriate content. Some videos are even the most popular among children. What should you do as a parent to protect your children? The BlockTube addon will add a filter group to the YouTube Search page to filter the content your children see. If you set a certain keyword, specific channel, comments or length, they will not see any content with those filter rules. For example, you can block videos your children are watching from the most popular channels on YouTube. You can deactivate the Trending page to block the most popular videos children are watching. The child will not see them anymore, as if they don't exist. You can also limit the amount of time a child can spend watching YouTube, as long as it is not more than 10 minutes per day. The addon is simple and fast to setup. It is integrated into the Firefox search bar so you don't need to install anything to use it. Leave feedback on the addon's website and send me your thoughts. One last thing, if you're looking for a solution to block YouTube content in the browser that is built into the OS, you should also check out Net Nanny. It's free and, since it is built directly into the Firefox browser, it is a fast and easy way to block online content while still being available on the browser's interface. Links: Official website How to install in your browser Add-on repositories How to use it? Live example of the addon in action All you need to do is type the keyword you want to filter content for, and press Enter or click on the block link. The list of filtered videos and, you guessed it, comments won't be visible on the site anymore.The World Wildlife Fund (WWF) has joined warring opposition parties in Nigeria to demand the immediate release of an over 30-year-old nun who has allegedly been kidnapped by suspected kidnapppers. The life-long nun, Reverend Obiora Nicholas, is a leading peace activist in the country and runs an NGO which works with local communities to protect children from violence, sexual abuse and gender inequality. Her NGO Nkalikaya, has reportedly been collating evidence of widespread human rights abuses in military barracks across the country and at the same time calling for the mobilisation of a nationwide protest movement.
