Birthday Reminder is a free Windows program that you can use to send a birthday greeting to all your friends in one click. You can choose a group of friends to whom you would like to send the birthday messages, and the program will send a special greeting to that group of friends on your selected day. The program supports over 20 languages, including English, French, Chinese, Arabic, Italian, German, and so on. Birthday Reminder has a multitude of

options to make your birthday messages more personalized and to make them even more memorable: you can choose to change the background image, the font style and size, and the message text. And if you have a photo album on your computer, you can select your favorite image from there to use as the background picture. Birthday Reminder has a simple user interface that makes it extremely user-friendly and simple to use. You can use a mouse to create a reminder or delete a reminder.

And it has a Windows XP color scheme. A day before your birthday, you can view all your past birthday messages and change the date of the birthdays that you haven't sent a reminder to yet. So it is highly suggested to use the Birthday Reminder software to send birthday messages to your friends. You'll surely enjoy it. Just go to the "Settings" menu and you will see the "Recipients" window. Click on the "Add" button to add a new friend. Now just select the "Birthday" or "Any Day" option

(this is the default setting) and click the OK button. You will be automatically shown the "Select Recipients" window. Select the "Birthday" option here and click OK. Now just select the dates and the names and the messages that you want to be displayed and then just click on the "New Reminder" button. Birthday Reminder Price: Free Last Updated: 06 May 2010 Requirements There are 2 modes for birthday reminder software. First is last year's birthday or first day and

second is current year. Current year checkbox cannot be selected for the current year birthday, i.e. the system will not do anything by default. This is how Birthday Reminder works. When you use a current year birthday, you can enter 0 days to the date (i.e. for the current year birthday, first day or yesterday).
