Free Shutdown Master [Win/Mac]

Free Shutdown Master Torrent

Powerful Shutdown Master is a powerful network enabled shutdown utility, that allows you to shutdown, log off, reboot, turn off, hibernate, enter in standby mode, shut down, reboot, and send messages to computers in your network, both automatically or manually with one mouse click. You can shutdown your computer at user defined times every day, by date or when cannot ping a specified IP address. For example, you can set it to shut down your machine at different times based on the day of the week. The program uses 24 hour format. Before shutdown you can specify to empty the recycle bin, delete records of recently accessed files, delete Internet Explorer cache files, cookies, history, disconnect from Internet, and run any application. Also provides access to shutdown, restart, standby, hibernate, and log off commands from the system tray and can save a list of machines to be reloaded later, at system startup. There are four types of shutdowns possible: Reboot, Shutdown, Standby, Hibernate. You may power off any computer from the system tray, by clicking on the corresponding icon, or use the remote shutdown utility on any Windows operating system from any distance. You can re-load the standby mode machine and other off-line computers on the network, with one mouse click. The program is fully compatible with any Windows operating system: 2000/XP/2003/7/Vista, so no separate installation is needed. To work with multiple computers you may pass "shutdown command" as an argument to your program. With this program you may: ⬜ Turn off your computers at user defined times. ⬜ Remote shutdown of your computer from any distance. ⬜ Access to the manual shutdown commands from the system tray and the shutdown dialog box. Free Shutdown Master has a special feature - "Work with multiple computers". If there are multiple computers and you have turned off all of them, your computer is being turned off, then machine starts turning on - from the first to the last. With Free Shutdown Master you can turn off computers in your local network, as well as turn off a computer from a distance, with one mouse click. For more details about Free Shutdown Master features, see the screenshots and see screenshots section. To start Free Shutdown Master, just double-click on the "FreeShutdownMaster" icon in your system tray, or use the shortcut "Ctrl+Alt+X". Free
