"By creating HyperMotion you've delivered on what the player wants: the feeling of really playing the game," EA SPORTS FIFA Lead Engineer Joe Chou said. "The key to delivering high-end play is how the ball moves, not just the position of the player. We used the data from more than 600 points of each player on the pitch. HyperMotion makes the player run, jump, dribble, head and foot control really work, because the ball follows the player motion and the player can use all of his skills to move as quick as they want. With the new player animation system, we were able to put the player's skills in the game and give them the same feeling of control across all skill levels." FIFA Ultimate Team™ is also getting a major overhaul with new content and features coming to the popular rewards program. Better Deals With deals being offered for Xbox One, and PS4 users, there are also discounts on PS3 and Xbox 360 Ultimate Teams. Ultimate Team is currently offering big discounts on packs like The Best - Ultimate Young Legends, The Best - Ultimate Young Legends, The Best - Club Legends, The Best - Platinum Runners, and The Best - Euro Legends. "For the Ultimate Team community, this is a great time to join and build your squad," said Sean Everett, CEO of EA SPORTS. "You're not only going to get discounted packs to complete your collection, but there's also exclusive items available that can't be found anywhere else." Up to 10% off Gold Packs For those looking to stock up on FIFA Points for Ultimate Team, EA SPORTS will be offering 10% off Gold Packs on Xbox One, PlayStation 4 and PC, including the new FIFA 22 Gold Pack. FIFA fanatics are highly-coveted on the X-Box One, PlayStation 4 and PC. More fans are on the platform than any other platform. The most successful new FIFA release of all time is also the most installed game on X-Box One of the last 12 months. "We had no doubt that fans would want FIFA on PS4 at launch. We had more than enough time to bring FIFA to all fans of the sport," said Andrew House, President and Group CEO of Sony Interactive Entertainment. "This is a truly global game where fans can follow their favourite players from every corner of the world as they compete in

Fifa 22 Features Key:

- The fastest-ever and most realistic on-field gameplay featuring close-control action and precise ball control.
- Global Gameplay
- FIFA Ultimate Team brings more additions to the game than any other new mode.
- Vision Control
- New Vision Control is ultra responsive and easy to use, reducing hand input to an absolute minimum. It not only makes the ball come and go quicker, but also responds more accurately to the player's hand movements and body positions.
- Simplified Controls
- FIFA 22 introduces Button Menus that streamline manual control into a more intuitive and better-feeling experience for core players. Simplified controls have been realized via changing the 3D linear control with 2D auto-execution features.
- New Match Types
- The new Match Types give players greater freedom on the field in all aspects of play. In possession, these three match types offer a way to handle the ball in innovative ways, compared to the only two options in the last FIFA version, when once a player controlled the ball and the other had it just waiting to attack. Winning possession through tackle, through the use of the ball or out of your area with a simple dribble or positional "sit" instead of an old-fashioned one-timer sees the concept of giving a team possession of the ball being revolutionized - and not a moment too soon.
- New Teammate Physic
- FIFA 22 introduces new and enhanced physics that real player movement drives off of with a new Teammate Physics system that gives players the feeling that their teammates are reacting to the momentum that goes with players connected to each other in the game.

What's new:

- **Improved Player Link:** In FIFA Ultimate Team, your progress is only shared with one player per squad - making it easier to swap between them. This means you get a closer look at their attributes and actions, and the new details in their appearance will make you want to swap them out.
- **Ball Physics:** Improved ball physics means the new ball behaves more naturally, passing more smoothly and feeling lighter. This also gives the ball a more realistic look as you control it, helping to make every pass feel more meaningful.
- **Team Training:** By assessing your club's playing style, the AI will adapt over the course of a campaign. You can also de-clutter matchday sessions by removing unnecessary and uninvited guests.
- **More Enhanced Offsides**
- **New Commentary Team**
- **More in-game communication including: Improved Fantasy Players, Season Updates, Squad Appearances and more.**
- **Improved Eco-System**
- **New goal celebration animation.**
- **New Visualization, Grid Lines and other match visual enhancements in FIFA Ultimate Team.**
- **New set pieces.**
- **Two new stadiums: Allianz Arena and MetLife Stadium**
- **World Cup and Olympic Game Modes**
