Every new edition of the #1 football video game offers four game modes: **Modes" on the main menu are included in the game and accessible from the main menu screen as well as when in other game modes. They are not disabled as they would be on a television (TV) console (PlayStation4 TV out not required) nor are they disabled as they would be on a handheld (PlayStation handheld out not required). **"Single player" modes cover both Single Player Career (manager) and Single Player Friendlies (player). **"Career" modes cover both Manager and Player Career modes (Career Mode). **"Team" mode covers "Team Career Mode" (FIFA Ultimate Team). **"Online" modes cover the new in-game network functions such as, find friends, call friends, form teams, play friendlies. **"View all" mode is the main menu and brings up all the main menus in a manner consistent with PS4 system menus. **"SHARE" (share button) option and the ability to both POST and UPLoad pictures to PSN. **"PLAY" (play button) option is to run the game either to continue a single player career or play friendlies. **"PLAY" (play button) option is to run the game as some other game. **"BACK" (back button) option takes players and gives players back to the main menu. **"CANCEL" (cancel button) option drops players to the main menu. Not sure if you care but there's an image that accompanies the announcement, and unlike with the other press release there isn't a disclaimer about the being fake. FIFA's other press release did have a disclaimer though. So, I guess they want to give this image a chance to prove it's legit.

FIFA (from FIFA: Football Club International) is the biggest football game franchise in the world. A FIFA game can be defined as the football (soccer) genre, where you (as the player) lead a football club. Football clubs are typically represented by a logo on a pitch (on the real pitch, or some other pitch) and compete in international championships (such as the FIFA World Cup™) or national championships (such as the FIFA Women's World Cup™) in the same vein as a real football club. The franchise had been around for over 30 years, following its release in September of 1989, with various music artists (including 3 Doors Down, Metallica, Sex Pistols, Placebo and The Prodigy) covering the FIFA World-Cup theme song and the FIFA World-Cup anthem between 1990 and 1994. The game itself is very strongly connected to the sport of football; it has always been inspired by the sport, has always had a football club simulated in it and has always used the real name of the sport as it is called in English, "football". The game received numerous upgrades on a yearly basis; every major patch has added features, bugfixes, gameplay changes, and new elements to the game. Tipping-scores in online matches, additional replays and enhanced penalties were the first major improvements included in FIFA 2000. The development of FIFA started in 1984 by Sumo Digital, a company based in the United Kingdom. Originally, the game was named "Play It!" but was forced to change the name to "FIFA" to prevent trademark infringements by English company of the same name, of a game called "Play It!". As the game was still very difficult at the time, it was quickly pulled out of the arcade and was made available for the MSX and BBC Micro platforms. The European Championship of 1994, which was played in England, is the first FIFA World Cup™ to be played in the UK. Compatibility in FIFA In June 1995, a patch was released which allowed the game to be played on Windows computers, as most operating systems of the time did not support 3D graphics. The game was then sold for the Sega CD and the PlayStation. The PlayStation 2 (PS2) used the existing game engine as the basis of the console's FIFA games. It is also the first FIFA game
