Danazol is an alternative treatment of intrahepatic cholestasis of pregnancy and has been shown to be effective. In view of the difficulty in predicting which patients are likely to benefit from the treatment, a structured prospective study of danazol in recurrent disease was initiated. Twenty-one women with intrahepatic cholestasis of pregnancy were treated with danazol for a mean of 14 months (range 7 to 25 months). Seven patients had received danazol previously and had been free of pruritus for a mean period of 7 months (range 4 to 12 months). Danazol produced a rapid and substantial reduction in pruritus. No side-effects or thromboembolic complications were encountered. The plasma bile acids were significantly reduced in most patients and the bile acid-binding capacity of the liver was restored in 15 patients and was within normal limits in seven patients. Show HN: First Android App Made in College - bkmartin ===== bkmartin Hey everyone. I decided to take a shot at building an android app for harmonization. It is based on the app Harmonization for iOS. I made this otherwise because my professor has a big interest in apps and that's a big plus. The end result is that it is a simple app, once you know all the basics. I'm looking for feedback on the app and also any issues that I might miss out on. I would appreciate any thoughts. Good luck to everybody on their app journey! ----- sudhish01 Awesome! Ahead of the UK's EU referendum, David Cameron has vowed to "learn from the mistakes of the past," while the country is poised for a political battle that will shape the future of the UK. As the UK looks to join the EU, polls show that 72 percent of Britons support "
