I have a similar issue on my Windows 7 computer that I'm trying to activate my Office 2013. The product key that I have is for Windows 7 Home Premium, and it gets an \"Incorrect Product Key\" error message. I'm not sure what this means or how to overcome this error. I just downloaded the trial version from activator site for Office, but can't register it, because a message \"You cannot register the trial version of Windows 7 Professional with Windows Store\" appears. Please help. Browser: Microsoft Internet Explorer 7 or above Memory: 512 MB of memory (RAM),1 GB recommended Disk space: 500 MB of free hard disk space for application files plus 50 MB working space needed during installation Internet connection: Web access needed for product registration, activation and obtaining live updates for the program. Additional requirements: To save DOCX, XLSX and PPTX files (for Microsoft Office 2007 Word, Excel and PowerPoint) you should have or install Microsoft.NET 3.0+ Framework on Windows XP. The different XPS related conversions do not require having Microsoft.NET 3.0 Framework installed. Note: Performance and speed will be enhanced if your computers processor, memory and available disk space exceed minimum requirements. This is especially true when converting very large color PDF files. Hyper-thread enabled or multiprocessor systems can deliver better performance. If you are using AVEVA EDGE for your license management there are some changes to the Activation URL which might need to be adjusted for your own environment. See below: AVEVA EDGE ACTIVATION URL: www.aveva.com/activate/EndorsedAcct/ AVEVA EDGE ACTIVATION URL: http://www.localhost.com/activate/EndorsedAcct/ For Licenses created before July 26, 2012, AVEVA EDGE ACTIVATION URL: http://localhost.com/activate/EndorsedAcct/

As I had not heard of any issues caused by the \"Elevated User License\", I was expecting that this would allow me to turn off Windows Defender. However, instead I received only security updates. Finally, I thought about the possible reasons why I did not get ESU updates. They could be because of the old antivirus software that I had not updated for a long time or because Windows Defender was not activated properly. I thought that the answer to both questions would be in the \"Activation\" section of \"Windows 7: ESU questions and more answers\" (see Post-processing issues with the Setup #4), but there were no details there. So I searched for more about ESU's activation and Windows Defender (see Windows 7: ESU questions and more answers Part 3). Using the Operational Hours feature, you can now determine the active time of a queue as well as create calendars to determine the off time of a Queue. Have a system shutdown at night Want to prioritize one queue over the other Want to set specific working hours for a queue Or maybe you simply don't want any automation activities to run on weekends or during holidays Now it is all under your control using the new Operational Hours feature. My Windows 7 SP1 was pulling security updates from Microsoft without any problems until January 2020. But after that, only security updates for Windows Defender came when I checked for updates in Windows Update. I had installed the ESU license in January 2020 and also activated it correctly (see Windows 7: Preparing for ESU and license activation Part 2). Also post-processing such as the installation of various preparation updates, etc. (see Windows 7: ESU questions and more answers Part 4) did not help. 5ec8ef588b
