
Wasatch Soft Rip 6 4 Fixed Cracked

i purchased 4 of the 6.5h one size larger for 3 kids ages 8,10,12. the leather is nice and soft. they seemed to break in very quickly. the zipper only rubs my face when i wear them and the tops don't rub/chafe on my shoulders when i hike. my oldest wears them on/off day round-trip to school (4.5 miles) and she doesn't have any problem with the zipper rubbing in her face. the kids don't get the no skin rubbing sensation on their shoulders that other skiers get. the fit is great. i bought them for my 5 month old and i thought i could get away without buying size 5's for him. the mid foot width seemed to work fine for him and the wedge heel is easy to bend right. i'll just send them back as the whole thing feels so weird. the soles are tough, but the edges and inside of the sole are not worn to a problem. the only risk is if you trample a large rock, you can crack the sole of the shoe. there is a family of 2 in the perfect shoe for this. love the boots. i wear a size 9 in all my other vasque boots and these are true to size. i was worried that they would be too small until i wore them for a week in june, and they seem to fit just fine. they have excellent arch support. they are a little wide for your average heels so if you have a narrow heel, you may want to consider going up a size. also, i had my boots wrapped for shipping - which was the best investment. chiropractic adjustment involves less trauma than conventional methods of treatment such as surgery and cortisone injection therapy, and is not only safer for the patient, but is less expensive. it is specifically designed to eliminate the source of the problem. not only does it relieve pain, but it restores full range of motion and helps speed the process of recovery and returning to a pain-free, active life.

minute. i'm not sure if i will be able to bring them to the zondervan wilderness retreat for the trek, but i will let you know. 5ec8ef588b
